Online REST & SOAP API Testing Tool

ReqBin is an online API testing tool for REST and SOAP APIs. Test API endpoints by making API requests directly from your browser. Test API responses with built-in JSON and XML validators. Load test your API with hundreds of simulated concurrent connections. Generate code snippets for API automation testing frameworks. Share and discuss your API requests online.

```
{  
  "message": "Welcome to the Simple Books API."  
}
```

The screenshot shows the ReqBin web application. The top navigation bar includes links for Curl, Python, JavaScript, Node.js, PHP, Java, JSON, and XML, along with Contact and Account links. A sidebar on the left lists various example requests. The main area is titled "Online REST & SOAP API Testing Tool" and contains a description of the tool. Below this, there is a text input field containing the URL "https://simple-books-api.glitch.me/orders", a dropdown menu set to "POST", and another dropdown menu set to "US". A blue "Send" button is to the right of these fields. Below the input fields, there are tabs for "Content", "Authorization", "Headers", and "Raw (4)". The "Content" tab is currently selected, and it shows a JSON response: {"message": "Welcome to the Simple Books API."}. To the right of the tabs are several icons for sharing, copying, and other actions.

Status: 401 (Unauthorized) Time: 171 ms Size: 0.04 kb

Content (3) Headers (7) Raw (9) JSON Timings

```
{  
  "error": "Missing Authorization header."  
}
```
