

# Local Server Configuration in windows server 2016

Open server manager – select local server

The screenshot displays the Windows Server 2016 Server Manager interface. The left-hand navigation pane shows the 'Local Server' tab selected under the 'Dashboard' section. The main area is titled 'PROPERTIES For WIN-93640UTJDAU'. It contains a list of system settings and their current states, such as 'Computer name', 'Workgroup', 'Windows Firewall', 'Remote management', 'Remote Desktop', 'NIC Teaming', 'Ethernet0', 'Operating system version', 'Hardware information', 'Processors', 'Installed memory (RAM)', and 'Total disk space'. Below the properties section, the 'EVENTS' section is visible, showing a list of events with columns for 'Server Name', 'ID', 'Severity', 'Source', 'Log', and 'Date and Time'. The taskbar at the bottom shows the Windows Start button, search icon, and several open applications, including the Server Manager.

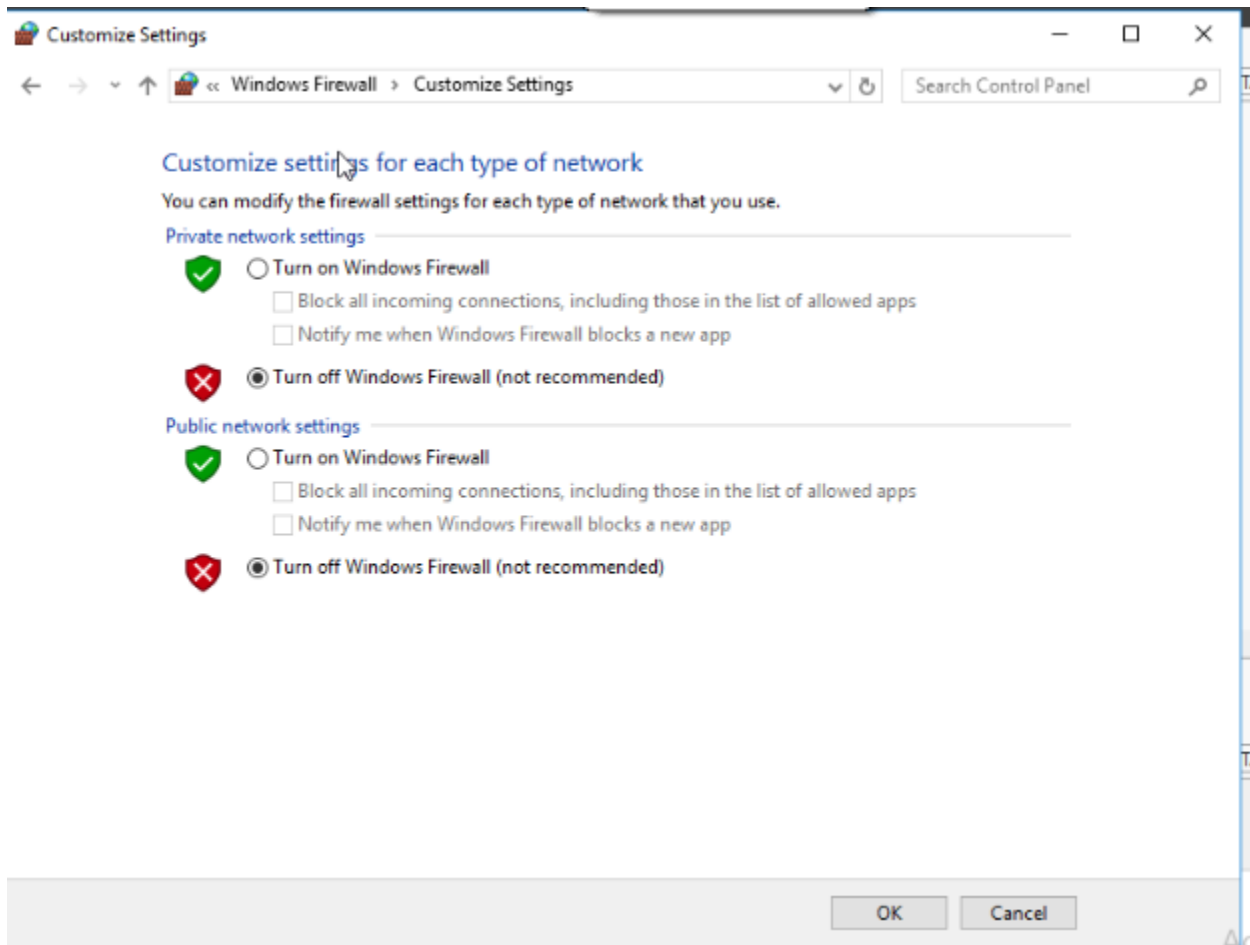

**Server Manager - Local Server**
